

FEDERAL GOVERNMENT OF NIGERIA

NATIONAL INFORMATION TECHNOLOGY
DEVELOPMENT AGENCY

TEMPLATE FOR SUBMISSION OF INFORMATION TECHNOLOGY
PROJECTS AND PROGRAMS FOR CLEARANCE BY
THE NATIONAL INFORMATION TECHNOLOGY DEVELOPMENT
AGENCY

BACKGROUND

The National Information Technology Development Agency (NITDA) was established under the NITDA Act 2007 with the responsibility for regulation and development of Information Technology in Nigeria. Under Section 6(b) of the NITDA Act 2007, the Agency's functions include to provide guidelines to facilitate the establishment and maintenance of appropriate infrastructure for information technology and systems application and development in Nigeria for public and private sectors.

Furthermore, several Government Circulars, specifically SGF/6/S.19/T/65 dated 18th April 2006 have designated NITDA as the clearing house for Information Technology Projects in Nigeria. This template is generated to elicit information on IT projects from MDAs for the purpose of clearance based on NITDA's Mandate.

The implementation of this mandate will assist in the harmonization of the implementation of IT projects within MDAs, reduction in the cost of IT project execution and duplication, development of the local IT market in volume of trade and content and ensuring accurate statistics as regards IT assets for Government.

In order to provide a holistic view of IT projects and systems for effective national planning and strategic direction for the country, a brief description of the history of systems and infrastructure used to date
